

## *High Temperature, Heat Resistant Dichroic Glass Filters*

*Available in hundreds of colors*

- **Wide range of super brilliant colors**
- **Durable and low maintenance**
- **High temperature resistant color filters**
- **Colors available frosted or clear**
- **Variety of glass thickness available**
- **Long lasting optical coatings**
- **Your choice of custom and standard sizes**

GamChroics™ are manufactured to high standards of consistency and performance. Precise optical coatings on heat resistant glass make these Dichroic Filters durable, ideal for low maintenance long life installation. GamChroics™ are available in a wide variety of traditional filter sizes for ellipsoidal spotlights, PAR units and MR16s. GamChroics™ can be made to match most colors and special color requirements can be satisfied. GamChroics™ can be made in custom sizes to meet your special requirements. Inquiries are welcome.

GamChroic™ are also available for U.V. filtering or infrared filtering. A combination of both U.V. and infrared is possible, as well. For more information about GamChroics™ unique line of Dichroic Filters visit us at [www.gamonline.com](http://www.gamonline.com) or call toll free at 888-GAMCOLOR (U.S. and Canada). Prices are dependent on size, quantity and color. We welcome your inquiries.

*Color sets the mood, GamChroics™ are the tools*
