

# GAMTORCH™

## The Self-Extinguishing *RealFlameTorch* Automatically extinguishes when safety switch is released

- GAMTORCH, the RealFlameTorch for your productions
- Tested and proven in hundreds of stage performances and outdoor spectacles
- Produces 16 inches of real flame from solid GAMFuel pellets
- Virtually smokeless and odorless, GAMTORCH is non-toxic and clean burning
- A real flame source that is environmentally safe

The automatic safety release latch will instantly snuff out the flame when the performers release their grip on the handle.

Load one to four GAMFuel pellets into the fire chamber, depending on the size of flame you desire. Four GAMFuel pellets will give you about 15 minutes of a 16 inch flame. The clean burning pellets leave almost no residue.

"It's not ugly....it's a bare bones skeleton that you can decorate!"

"GAM has provided the mechanism - a nice, safe, clean profile - that someone can play with."

- Tom Bliese, Scene Designer, MSU Mankato

GAMTORCH™ was specially designed by Tom Bliese for a production of "Medea". The GAMTORCH™ was modified using standard lamp parts to look like an antique torch.
